

Lei Gao

UCL Interaction Center, Multi-Sensory Devices Group
169 Euston Road, London, NW1 2AE
Email: lei.gao.20@ucl.ac.uk

I'm focusing on Human-Computer Interaction (HCI), especially in creating new interactive prototypes using advanced methods like Acoustic Levitation. I'm also interested in Haptics, VR/AR/XR systems, and using data-driven methods to develop effective applications.

Education

- 2020-Present **PhD of Computer Science in HCI** **University College London, UK**
Supervisor: Prof. Sriram Subramanian, Associate Prof. Diego Martinez Plasencia
Funded by UCL Research Studentship (EU Horizon 2020)
 - 2017-2020 **Master of Engineering in Computer Technology** **Xidian University, China**
Supervisor: Prof. Bo Wan
 - 2013-2017 **Bachelor of Engineering in Digital Media** **Shandong University, China**
-

Research experiences

- 2020 – Present **Building Applications Using Acoustophoretic Interfaces** (PhD thesis topic)
 - My research seeks to adopt the acoustophoretic technique to build effective design and technical solutions tailored to real-world application scenarios, making reconfigurable and multi-modal prototypes and artifacts with diverse tangible materials.
 - a). Combining with data physicalization, I develop and present **DataLev**, a design framework and building platform that enables mid-air data physicalizations with enriched materiality, multi-modal interactions, and mixed-reality animations.
 - b). Combining with digital gastronomy, I propose three novel techniques enabled by programming acoustophoretic interface that enables computational food processing and fabrication by precise control food materials.
 - c). To enhance the stability and robustness of real-world applications, I build **StableLev**, a data-driven pipeline for the detection and amendment of instabilities in multi-point acoustic levitation.
- 2019 – 2020 **Multi-user interactions in Augmented Reality** (Master thesis topic)
 - Propose multi-user interaction model in Augmented Reality (AR) and develop a collaborative AR system enabling multimodal interactions, showcasing advancements over conventional collaboration methods.
- 2018 – 2020 **Culture learning in Virtual Reality**
 - Compare the culture learning performance (knowledge, behavior, attitude) in VR and non-VR scenarios through quantitative studies.
- 2017 – 2019 **Code classification for C programming assignments**

- ° Design a neural network-based algorithm to detect code similarity and develop a clustering method that categorizes solutions for programming assignments
-

Visiting, invited talks, symposium

- Modern Magic Tricks: Mid-air displays using acoustic levitation. (2022/May/25 visiting Xidian University)
 - DataLev: Mid-air Data Physicalisation Using Acoustic Levitation. (2023/May/25 visiting Institute of Software, Chinese Academy of Sciences)
 - Post-CHI XR summer school (2023/May/2-3 at University of Copenhagen)
 - Symposium of Extended Reality (2023/May/4 at University of Copenhagen)
-

Teaching experiences

- COMP0160 Perception and Interfaces (23-24), University College London
 - PSYC0095 Future Interfaces (22-23), University College London
 - COMP0113 Virtual Environments (21-22), University College London
 - COMP0021 Interaction Design (20-21), University College London
-

Academic services

- Peer reviewing: CHI 2023 Late breaking work and Alt.chi
 - Peer reviewing: ISS 2023
 - Peer reviewing: Chinese CHI 2023
 - Volunteer: ICRA 2023, London
